

Week 4 Update:

1. Finished the database schemas, populated the database with 'fake' data which corresponded to the different scenarios we decided to support in our final presentation. These 'fake data' include profiles, books, selling list, wanting list, and offers data.
2. Implemented the front page, search results page.
3. Completed usability testing on our interactive wireframe.
4. Redesigned the digital mockup for the user profile page with "buyer view" and "seller view".
5. Made more tweaks to the digital mockups based on the feedback during the meetings.
6. Setup gitHub for everyone.
