Week 5 Update:

- populated the database with images for books and profiles
- decided to add a chat interface to our design which allows users to communicate further after they agreed on the price and urgency
- linked front end to the back end of the search page (front page), this enable the search functionality on the front page.
- Suggestion while typing

- Implemented the results page with the ability to 'View Listings' ('Sell This' Button is not working).

- Implemented View Listing page (the one after the result page). With both the View Details and Make Offer buttons working.

- Implemented the Profile page for both the Buyer and Seller views.
